DOOR SPECIFICATIONS

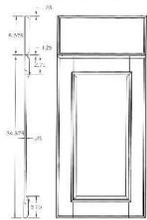

DOOR SPECIFICATION PAGES

Each Door Family or Door Design has 4 pages of information in the Specification Book

Rutt Door Families Abbey — Contemporary

The traditions that are "Abbey" are created from the collections of the English Equities. From the small country seat to the abbey just inside the town walls, RUTT's "Abbey" style celebrates in authentic styled details of the 18th and 19th century England.

Rutt Door Families Abbey — Contemporary

Characteristics

Each of our doors has unique styling, construction, finish considerations, or style accessories, as represented by RUTT's specifications chosen to use Quick Quote ordering system. Each specification choice is explained in detail in the Quick Quote Specification section of this manual.

The following describes the style characteristics of this door and the unique design features you should look for:

Door Frame:
 Made with 3/4" wide door stile and rail, joined together at each corner.

Door Inside Profile:
 The interior finish profile, square, with the square bead w/3/8 Rubber moulding applied around each panel.

Door Panel:
 Door is made with 1" veneer panels. These panels are held rigid in the frame providing a secure base for application of the square and round inside door moulding.

Doors:
 The above components create the unique style attributes of our Abbey doors. Box wall, lower rail and upper rail doors require a center rail with equal steel mesh when they reach 137" tall or taller. The 45" height specification also applies to single top glass doors, vertical glass doors, operable doors and doors prepared for glass. The need for a center rail in multiple doors is also applicable. Most interior doors can be made in heights up to 60" before they require a center rail. The door profile association is 7 1/2".

Options:
 The smallrawer (rail) is featured in deep glazed solid wood in a contemporary style with the "7 1/2" profile. Larger drawers are constructed from steel mesh with 1/4" x 1/4" slats and rails. The same 1/4" radius center panel is used with matching inside drawer front moulding. The large drawer profile matches that of the drawers in the "Gate" 7 1/2".

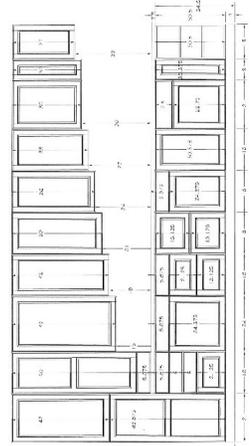

Optional Design Considerations:
 Abbey — Contemporary may also be ordered with any of the following available options:

- Accessories: Glass, Moulding, Contemporary Country Trim
- Door Panel: Glass, Faded, Core & Wood, Easy Close, Reverse Bead, Core Beveled, Staggered, Quarter Round & Cove, & Panels.
- Drawers: Side (top drawers are available in the specifications by selecting solid wood drawer front).
